

International School of Bremen

International Baccalaureate

A Guidebook to the

IB Diploma

ISB Mission Statement

The International School of Bremen is a private school for students within the internationally oriented community of Bremen.

In partnership with family and community, ISB maintains a high commitment to educational excellence in both teaching and learning. It provides an academic, social and physical education in English that promotes the development of responsible, ethical citizens in an ever-changing global society.

Beliefs

The International School of Bremen believes that

- *All children have the ability to learn and learn at different rates.*
- *Children have different learning styles and interests.*
- *Children have the right to a safe and caring learning environment.*
- *Children can make positive contributions to their environment.*
- *Education is the shared responsibility of school, home and community.*
- *Education should develop understanding of various cultures and appreciation of diversity.*
- *Character education is important in the development of responsible global citizens.*
- *Education should inspire students to become life-long learners.*

IB Student Profile

IB learners strive to be

Enquirers *They develop their natural curiosity. They acquire the skills necessary to conduct enquiry and research and show independence in learning. They actively enjoy learning and this love of learning will be sustained throughout their lives.*

Knowledgeable *They explore concepts, ideas and issues that have local and global significance. In so doing, they acquire in-depth knowledge and develop understanding across a broad and balanced range of disciplines.*

Thinkers *They exercise initiative in applying thinking skills critically and creatively to recognize and approach complex problems, and make reasoned, ethical decisions.*

Communicators *They understand and express ideas and information confidently and creatively in more than one language and in a variety of modes of communication. They work effectively and willingly in collaboration with others.*

Principled *They act with integrity and honesty, with a strong sense of fairness, justice and respect for the dignity of the individual, groups and communities. They take responsibility for their own actions and the consequences that accompany them.*

Open-minded *They understand and appreciate their own cultures and personal histories, and are open to the perspectives, values and traditions of other individuals and communities. They are accustomed to seeking and evaluating a range of points of view, and are willing to grow from the experience.*

Caring *They show empathy, compassion and respect towards the needs and feelings of others. They have a personal commitment to service, and act to make a positive difference to the lives of others and to the environment.*

Risk-Takers *They approach unfamiliar situations and uncertainty with courage and forethought, and have the independence of spirit to explore new roles, ideas and strategies. They are brave and articulate in defending their beliefs.*

Balanced *They understand the importance of intellectual, physical and emotional balance to achieve personal well-being for themselves and others.*

Reflective *They give thoughtful consideration to their own learning and experience. They are able to assess and understand their strengths and limitations in order to support their learning and personal development.*

1 General Outline and Course Description

The IB Diploma Programme is a two year, pre-university course designed to facilitate the mobility of students and promote international understanding. The comprehensive course of study for the IB Diploma is designed to provide students aged 16 to 19 with a balanced education. It offers a 2-year curriculum in 6 subject groups – including two Modern Languages, Individuals and Societies, Sciences, Mathematics and The Arts (or other options).

The programme is flexible enough to allow students to satisfy national curricular requirements. At the International School of Bremen (ISB), many students will want to ensure that their particular programme meets the requirements for entrance into German universities. Students planning special post-secondary programmes will need to be aware of their specific admission requirements.

1.1 The Curriculum

Programme Model

The curriculum is shown with six academic groups surrounding the three core requirements.

Students study six subjects selected from the subject groups. It is usual that three subjects are studied at Higher Level (HL) (courses representing 240 teaching hours), and the remaining three subjects are studied at Standard Level (SL) (courses representing 150 teaching hours).

All three parts of the core – Extended Essay, Theory of Knowledge and Creativity, Activity, Service (CAS) – are compulsory and are central to the philosophy of the Diploma Programme.

To gain the IB Diploma, all candidates must

- Take one subject from each of the academic groups
- Take at least three, but not more than four, of the six subjects at HL and the remaining subjects at SL. Students may also take a seventh subject, outside of the IB Diploma, and gain an extra certificate
- Submit an Extended Essay in one of the IB subjects
- Follow a course in Theory of Knowledge (TOK)
- Complete all CAS requirements.

1.2 The Six Subject Groups

Group 1: Language A

This subject promotes oral and written communication skills in the student's native language while providing international perspectives through a world literature component. Where no teacher is available, a student may be able to study Language A as a self-taught candidate at SL only. The range of texts studied is broad so that students grow to appreciate the wealth and subtleties of the language in a variety of contexts. This course provides excellent preparation for those students wishing to study a literature-based course at university.

Language A - First Language Offerings: English and German at HL and SL

A variety of other languages may be examined within the International Baccalaureate structure but the instruction generally takes place outside of school with external teachers whose fees are paid directly by parents.

Language A - Self-Taught Offerings

These are only available at SL and can include, among others, Chinese and Russian.

Group 2: Second Language

Language B – Offerings include English, French, Spanish and German at HL and SL

This is a foreign language course for students with some previous experience of learning the language. The aim is to develop the skills of listening, speaking, reading and writing through the study of a wide range of styles of literary and non-literary texts.

Language ab initio

These courses are for beginners, i.e. students who have little previous experience of learning the language they have chosen. These courses are only available at SL. Note: Not all languages will be offered every year.

Group 3: Individuals and Societies

The subjects in this group foster an appreciation of both change and continuity, and of similarity and difference through local studies and global perspectives.

History (offered at HL and SL) involves an historical analysis of the political, cultural, economic and social events defining 20th Century World History and 19th and 20th Century European History. Some of the topics include: causes, practices and effects of war, the origin and development of authoritarian and single-party states and the Cold War. In all activities a global perspective is required. An historical investigation is also a component part of the course.

Economics (offered at HL and SL) is a subject involving case studies, macro-economics and evaluation of current and historical economic trends. There is considerable coursework involved and extensive independent reading is necessary. Students who only do Mathematical Studies will find it difficult to pursue this course.

Group 4: Sciences

Each of the subjects offered promotes an understanding of the concepts, principles and applications of the experimental sciences in general. Practical laboratory skills are developed and collaborative learning is encouraged by means of an interdisciplinary group project. This is further supplemented by the study of options. An awareness of moral and ethical issues is fostered and social responsibility is actively promoted through the discussion of local and global issues.

Biology deals with the Chemistry of Life, Nucleic Acids and Proteins, Cells, Cell Respiration & Photosynthesis, Human Health and Physiology, Human Reproduction, Defence Against Infectious Disease, Excretion, Nerves, Muscles and Movement, Ecology & Evolution, Genetics, Neurobiology & Behaviour and Plant Science.

Chemistry investigates Atomic Theory, Electronic Configuration, Bonding and Structure, Hybridization, Carbon, Periodicity, Stoichiometry, Energetics of Equations, Hydrocarbons and Chemistry of Medicine and Drugs.

Physics is oriented towards Mechanics, Optics, Measurement and Uncertainties, Astrophysics, Thermal Physics, Electromagnetism, Atomic and Nuclear Physics and Quantum Physics.

A Group 4 Project is a compulsory component and is usually timed in the week prior to the start of the second year of the IB. Please be aware of this when planning holidays.

Group 5: Mathematics

There are three courses to accommodate the range of needs, interests and abilities of students, and to fulfil the requirements of various university and career aspirations.

These courses aim to enable students to

- Develop mathematical knowledge, concepts and principles*
- Develop logical, critical and creative thinking*
- Employ and refine their powers of abstraction and generalization.*

Students are also encouraged to appreciate the international dimensions of Mathematics and the multiplicity of its cultural and historical perspectives.

Mathematics HL is designed for students with competence and a strong background in Mathematics and who enjoy mathematical challenges. Some select this course to prepare for a Mathematics course at University or related courses such as Physics, Engineering or Technology. Topics include Algebra, Permutations and Combinations, Functions, Trigonometry, Complex Numbers, Vectors, Matrices, Probability and Statistics, Calculus and the study of a detailed option.

Mathematics SL is intended to provide a sound mathematical basis for those students planning to pursue further studies in fields such as Chemistry, Economics, Geography or Business Administration. It is a demanding course containing a variety of mathematical topics and requires a sound level of technical ability. Topics include Algebra, Functions, Trigonometry, Vectors, Matrices, Probability and Statistics as well as Calculus.

Mathematical Studies SL is offered, but it should be noted that students who work at this level will not have their level of Mathematics recognized for certain courses at university, especially if considering courses at German universities. Mathematical Studies is the option for students who are unlikely to require a higher level of Mathematics beyond their secondary schooling.

Emphasis is placed on the application of Mathematics to real-life situations. Topics include Algebra and Equations, Functions, Sets and Logic, Probability and Statistics and Financial and Business Mathematics. A substantial piece of research, in the form of a project, is undertaken concurrently.

Group 6: The Arts

The arts subjects in this group place emphasis on practical production by students and the exploration of a range of creative works in a global context.

Visual Arts: This course involves the production of an exhibition of art works based upon a theme, the study of organic and manufactured subject matter, abstraction in the work of a 20th century artist, Still Life, Figure Drawing and Figurative Art. In the second year, students follow a personalized course of study based upon their own interests and talents. The research workbook which includes a cross-cultural study, is a substantial component of the course.

Students who do not wish to take a subject from this section may take an additional subject from any one of the first five groups where an alternative is available.

1.3 Three Special Diploma Requirements

The three core requirements are

- *Creativity, Activity, Service*
- *Theory of Knowledge*
- *Extended Essay*

All Diploma Programme students must engage in each of these three activities and complete it at a satisfactory standard.

Creativity, Activity, Service (CAS)

Participation in the School's CAS programme encourages students to be involved in artistic pursuits, sports and community service work, thus fostering students' awareness and appreciation of life outside the academic arena. The aim of CAS is to challenge each individual student, develop self-confidence and inspire a sense of responsibility towards the local and international communities.

Creativity challenges students to be involved in a creative endeavour such as The Arts, Music, Photography, or they show creativity in designing and carrying out service projects.

Activity can include participation in individual and team sports, expeditions and in local, national or international projects. Involvement in both the school and local community is encouraged.

Service provides an opportunity for students to work with charitable organizations, for example helping children with special needs, visiting hospitals or working with refugees.

Students are expected to complete a minimum of 50 hours in each of the three areas of CAS. A system of self-evaluation encourages students to reflect on the benefits of participation to themselves and to others.

Each student will receive a CAS Diary from the CAS Coordinator which outlines the expectations and documentation requirements. The CAS Coordinator ensures that the programme runs successfully and meets regularly with each student. The students organize a variety of fund-raising school-based activities throughout the year.

The Duke of Edinburgh's Award Scheme: Students also have the opportunity to participate in The Duke of Edinburgh's Award Scheme, which involves all three elements of CAS.

A student who does not meet the required 150 hours of service for CAS and/or does not complete the related reflective and evaluative writing cannot be awarded an IB Diploma and might not complete ISB school graduation requirements.

Theory of Knowledge (TOK)

This is a compulsory component for all IB Diploma students. The interdisciplinary TOK course is designed to provide coherence by exploring the nature of knowledge across disciplines and encouraging an appreciation of other cultural perspectives.

Within TOK, students are encouraged to reflect on all aspects of their work throughout the Diploma Programme. For example, students reflect on the nature of poetic truth in literature and contrast such truth with that obtained in other systems of knowledge - the historical fact, the scientific fact or a mathematical proof. They also examine the grounds for the moral, political and aesthetic judgments that individuals must make in their daily lives. Emphasis is placed on the role of language, thought and on the development of each student's critical thinking skills.

Throughout their studies, an international perspective is encouraged. Although reflection and introspection might be seen as a "western" pursuit, in all areas of work "non-western" sources and influences will be reviewed and investigated.

Assessment involves an externally marked essay of 1200 – 1600 words and an internally assessed class presentation.

The Extended Essay

This is a compulsory component for all IB Diploma students. The Extended Essay offers the opportunity to investigate a topic of special interest while developing independent research and writing skills expected at university level.

Candidates are required to undertake original research and write an essay of 4000 words. A total of about 40 hours of private study and writing time is recommended.

The Extended Essay must be registered in one of the subjects from one of the six subject groups.

Each student is supervised by a teacher whose role is to provide both academic and general guidance on time management and the overall structure and presentation of the paper. The teacher also ensures that the essay is the candidate's own work.

The essay is externally assessed by an examiner appointed to the school and selected by the IBO. More information can be obtained from the *ISB Guide to the Extended Essay*.

TOK and Extended Essay External Assessment

Each student's performance will fall into one of five bands according to the quality of work in each of these two important IB requirements, TOK and the Extended Essay.

- Band A Work of an excellent standard
- Band B Work of a good standard
- Band C Work of a satisfactory standard
- Band D Work of a mediocre standard
- Band E Work of an elementary standard

Thus, a student who achieves Level B for Theory of Knowledge and Level C for the Extended Essay will be awarded one bonus point. A student who achieves Level E in either Theory of Knowledge or the Extended Essay will not be awarded an IB Diploma.

An IB Diploma will also not be awarded in the following cases

- If no Extended Essay is submitted by the stated deadline
- If the Essay has not been supervised by an appropriate teacher
- If the Essay is plagiarized
- If the Essay is a repetition of work done in class and/or work internally assessed
- If TOK is not completed to a satisfactory level.

The total number of bonus points awarded will be determined according to the following matrix:

Theory of Knowledge

		Excellent	Good	Satisfactory	Mediocre	Elementary	Not submitted
Extended Essay	A	+3	+3	+2	+2	+1 Failing condition	N
	B	+3	+2	+1	+1	0 Failing condition	N
	C	+2	+1	+1	0	0 Failing condition	N
	D	+2	+1	0	0	0 Failing condition	N
	E	+1 Failing condition	0 Failing condition	0 Failing condition	0 Failing condition	0 Failing condition	N
		N	N	N	N	N	N

2 Assessment and Examinations

2.1 Assessment Goals and Methods

The International Baccalaureate Organization (IBO) assesses students' work as direct evidence of achievement against the stated goals of the Diploma Programme courses.

The Diploma Programme goals provide students with

- *A broad and balanced, yet academically demanding programme of study*
- *The development of critical-thinking and reflective skills*
- *The development of research skills*
- *The development of independent learning skills*
- *The development of intercultural understanding*
- *A globally recognized university entrance qualification.*

Diploma Programme assessment procedures measure the extent to which students have mastered advanced academic skills in fulfilling these goals, for example

- *Analysing and presenting information*
- *Evaluating and constructing arguments*
- *Solving problems creatively.*

Basic skills are also assessed, including

- *Retaining knowledge*
- *Understanding key concepts*
- *Applying standard methods.*

In addition to academic skills, Diploma Programme assessment encourages an international outlook and intercultural skills where appropriate.

Assessment tasks are designed to support and encourage good classroom teaching and learning. Students' results are determined by their performance against set standards, not by each student's position in the overall rank order. The awarding of grades is criteria-based. All subject and assessment components have clearly defined criteria. These are made available to students.

Methods

- *All students write examinations at the conclusion of the two-year course. These are externally set and graded by the IBO*
- *Each subject has an internally assessed component (approximately 20%) and an externally assessed component (approximately 80%)*
- *The grading system used by the IBO is criteria-referenced. This means that each student's performance is measured against well-defined levels of achievement*
- *The assessment criteria for all assessment components are shared with students and are an important part of their learning process*
- *External examiners are trained to assess work from an agreed perspective using common mark schemes.*

Various modes of assessment are used including oral and written, long and short responses, data-based questions, essays, multiple choice questions, a portfolio for art students comprising photographs of their work, and recordings of internal oral language exams.

2.2 Rules and Guidelines for IB Examinations

In order to maintain the IBO's regulations, the following rules are rigorously observed and enforced for all examinations.

- Students should ensure that they arrive at the Examination Room at least 10 minutes before the official start of the examination. Five minutes are permitted for reading through the paper before an examination begins
- On arrival at the Examination Room, students should wait for directions from the Examination Presiding Officer
- Students may only have on their desk the equipment they need for the examination (i.e. pens, pencils, ruler, eraser, equipment for geometry). It is advisable to have spare pens and pencils
- Bags, pencil cases etc. are not permitted in the Examination Room
- No electronic dictionaries or mobile telephones are permitted in the Examination Room
- Normal translation dictionaries are only permitted where appropriate. They are not allowed in any language examinations
- Calculators are only permitted by permission of the Presiding Officer and the rules governing the examination. Students are advised to bring additional batteries for their calculator
- If students have a question or problem, they should raise their hand to attract the invigilator's attention. The invigilator is the ONLY person with whom the student is allowed to communicate in any way during the examination. However, generally the invigilator is not permitted to answer questions related to the examination
- Students may not leave the Examination Room during the course of an examination
- No student is permitted to communicate with any other student until all students have been dismissed from the Examination Room.

2.3 Academic Malpractice (Cheating)

All students are required to read and sign the ISB Academic Honesty Agreement Declaration.

Internal Exams:

The following penalties apply for anyone caught cheating

1st offence: The paper will be cancelled and an examination mark of 0 will be recorded for that subject

2nd offence: All the papers for the examination session will be cancelled and examination marks of 0 will be recorded

3rd offence: The same as for the 2nd offence, but in addition the student will be suspended from school or asked to withdraw from ISB.

External Exams:

If academic malpractice occurs, the matter is reported directly to the IBO and could result in loss of all marks and no Diploma being awarded.

Course Work and Internal School Work:

If cheating occurs in any form, students are warned. If a repeat offence occurs, that student may be suspended and the IBO may be informed.

Plagiarism:

Students are encouraged – in fact, expected – to seek the knowledge, expertise, opinions and ideas of others through library research, internet searches, personal interviews and collaboration with other students, however, students are reminded that there is a fine, but essential line between proper acknowledgement of the origins of that information and plagiarism. Plagiarism is the act of taking ideas, passages, or particular turns-of-phrase from another person or another work and representing them as the writer's own. It is essential that students always appropriately attribute knowledge and language to their rightful author.

2.4 Grading, Results and Grade Scales

Each student must meet defined standards and conditions including a minimum total of 24 points and the satisfactory completion of the three diploma requirements: TOK, the Extended Essay and CAS for an IB Diploma to be awarded.

Each examined subject is graded on a scale of 1 (minimum) to 7 (maximum). The ISB assessment scale is reflective of this. The minimum score of 24 is based on the fact that a “grade 4” represents a satisfactory level in each subject. Excellent performances in each of the six subjects results in a “grade 7” for each - or a total of 42 points.

The quality of work in both TOK and the Extended Essay is assessed against assessment criteria and the results are described according to five categories: elementary, mediocre, satisfactory, good and excellent (E, D, C, B, A, respectively).

TOK and the Extended Essay contribute to the overall score through a system which awards up to three points based on the student's combined performance. Please refer to “TOK and Extended Essay External Assessment” in the assessment portion of this booklet on page 10.

The maximum possible IB Diploma points score is 45.

Grade 11 Reports

In Grade 11, the October/November report provides a good indication of progress in the School Year and is especially important for students who have entered courses on a trial basis because at this time the situation may be reviewed. The second report is issued in February. The final report of the School Year will be distributed at the end of the School Year, in June.

Grade 12 Reports

In Grade 12 again a report will be issued in October/November. This is just prior to final registration of subjects with the IBO. Another report will be issued in February. The results of Mock Examinations are reported to parents in early February.

At Graduation, a student will receive an ISB Diploma, as described later, and a final summative report, a transcript which shows all semester grades from Grade 9 onwards where appropriate.

All grades and transcripts from Grade 9 onwards are shared with universities and other higher educational institutions and will form part of the reference in support of each student as s/he leaves the School.

Internal Examination Results

These are recorded and issued separately, usually at the start of June in Grade 11 and late January or early February in Grade 12.

Final IB Results

Final IB results are available to the school and to students electronically in early July on completion of Grade 12. IB Diplomas and other documentation are distributed in September.

3 The IB and University Recognition

International Baccalaureate Diploma holders gain admission to colleges and universities throughout the world. Formal agreements exist between the IBO and many Ministries of Education and private institutions. Some colleges and universities may offer “advanced standing” or “course credit” to students with strong IB examination results.

Further information on the IB programme can be obtained on the International Baccalaureate’s official website <http://www.ibo.org/>. Further information regarding the IB programme at ISB may be obtained from the IB Coordinator.

German citizens wishing to attend a public German university must follow the specific guidelines outlined below.

3.1 The IB and German University Requirements

In March 2004 the International Baccalaureate Diploma was formally recognized as an acceptable alternative to the Abitur Certificate for the purposes of university entrance in Germany. Consequently, it is now regarded as a suitable qualification for German university entrance for German citizens (who are completing the IB in Germany). However these students must

- *Complete a minimum of 12 successive years of full-time education*
- *Study a Science (Group 4) at HL or Mathematics (Group 5) at HL*

- Study German A and one other language at least to B HL level
- Select Mathematics HL or SL, and not select Mathematics Studies (Group 5)
- A minimum of a grade 4 is required in each of the six subjects. If a grade 3 is awarded it can be offset once by a grade 5. Any grade 2s invalidate equivalence
- The Conference of Ministers of Education rulings on recognition of the IB Diploma are available from the School Office. Note that in December 2009 the Ministers agreed that German universities, being autonomous, had the right to be flexible in their interpretation of the rules for admission to their universities.

A word of caution:

It must be noted that if a grade 3 or lower is awarded in any subject, a student might be excluded from entering an institution of higher learning in Germany and, perhaps, elsewhere too, even though s/he has graduated and has an IB Diploma.

4 International School of Bremen Graduation Requirements

ISB offers different levels of diplomas. Each of these is outlined below.

4.1 International Baccalaureate Diploma

If a student successfully completes all the requirements outlined in this handbook (Extended Essay, TOK, CAS), achieves a minimum of 24 IB points and fulfils certain other conditions, then through the IBO the student is awarded an IB Diploma.

4.2 An Alternative to the Diploma Programme

All students at ISB are encouraged to participate in the Diploma Programme. Those who do not satisfy the entire set of requirements or who elect to take fewer than six subjects, are awarded a document to certify participation in the IB Diploma courses. Some students choose to take all six subjects at SL, together with TOK and CAS and may or may not choose an Extended Essay. They are Programme candidates rather than Diploma candidates. In addition, all students must reach the graduation requirements of ISB as outlined below.

4.3 International School of Bremen Diploma with Academic Honours

In order to attain the status of ISB Diploma with Academic Honours a student must

- Complete the IB courses
- Complete the required 150 hours of CAS
- Achieve a total score of 21 or higher in the following IB exams
 - Maths or Maths Studies
 - First Language, Second Language, Art
 - Science, History, Economics.

For any HL course examination, ISB will add one point to the IB school grade; therefore, if a student receives a grade 4 on the HL Chemistry examination, ISB will add one point for the purpose of graduation and regard this as a grade 5.

It must be understood that the ISB Diploma with Academic Honours indicates that a student has graduated at a level which may allow entry into Liberal Arts colleges, some universities or vocational courses.

4.4 International School of Bremen General Diploma

In order to attain a status of ISB General Diploma, a student must

- Complete the IB courses
- Complete the required 150 hours of CAS
- Attain a total score of 19 on the following IB exams
 - Maths or Maths Studies
 - First Language, Second Language, Art, Science, History, Economics.

For any HL level course examination, ISB will add one point to the IB grade; therefore, if a student receives a grade 4 on the HL Chemistry examination, ISB will add one point for the purpose of graduation and see this as a grade 5.

It must be understood that the ISB General Diploma indicates that a student has graduated at a level which may allow entry into vocational courses and a variety of other post-secondary education programmes.

4.5 School Leaving Certificate

*A student who is unable to achieve a minimum of 19 points in the prescribed groups will be awarded a **School Leaving Certificate** to indicate that s/he has completed 12 years of full-time education.*

A word of caution again:

Regardless of the type of Diploma awarded, it must be noted that if a grade 3 or lower is awarded in any subject, a student might be excluded from entering an institution of higher learning in Germany and, perhaps, elsewhere too, even though s/he has graduated.

5 ISB IB Diploma Admission Policy

This admission policy is an adjunct to the General Admission Policy of the school. All criteria within General Admission Policy apply.

Admission into the ISB IB Diploma Programme is non-selective regarding academic ability as long as the student can construct a suitable Diploma combination of subjects, meets ISB General Admission requirements and is committed to an international education that is academically demanding.

In addition, the following factors will determine entry into the IB Diploma Programme

- *Attendance in Grade 10 at ISB with grades that suggest that it is worthwhile that the student continues their studies at ISB. Normally students would have completed IGCSE's, and teachers, in consultation with the Management Team, will deem it appropriate for the student to continue attending ISB into the IB Diploma Programme*
- *Students entering into Grade 11 to begin the IB Diploma must*
 - *Show evidence that they have completed appropriate courses to a Grade 10 level in a previous school. This is usually done by providing a school report of the first semester of Grade 10 (or the second semester of Grade 10 if applying in the summer prior to Grade 11) or IGCSE or equivalent examination results*
 - *Be interviewed with a parent or guardian by the Director of the school or their designate and meet all general entry requirements*
 - *When declaring a learning disability at admission point, provide appropriate official documentation describing the difficulty and official recommendation as to how best support the student. The general rules of accepting students with learning difficulties will apply. Support for such students during the Programme will be within the Special Education Needs ISB IB Policy*
 - *When declaring a physical handicap, a judgment will be made as to whether the student can reasonably, safely and comfortably be accommodated in the building, in offsite facilities, and through the school's timetable after all reasonable adjustments have been made (it should be noted that the school has a lift and all sections of the school are reachable by wheelchair)*

- *Show evidence that they will be supported by parents or guardians during the whole of the Diploma Programme. Either a parent or guardian must usually be resident within the environs of Bremen. If not, a suitable carer living within the environs of Bremen needs to be designated. When a student has refugee or similar status, a representative of the caring organization must be interviewed by the Director or their designate*
- *Accept that failure by the obligor to pay all stated fees in a timely manner will result in the curtailing of the right to continue with the IB Diploma Programme at ISB*
- *Accept that breaches in the Academic Honesty Agreement Declaration might result in the ending of the right to continue with the IB Diploma Programme at ISB.*

6 Contact Details

If you wish to receive any further information on the International Baccalaureate Diploma Programme at the International School of Bremen, please go to the School's website www.isbremen.de and do not hesitate to make an appointment through our School Office.
